Transition to High-value Agriculture Project

Development of River Basin Management Plan

Sergiu Budesteanu

Chișinău, Moldova

July 3, 2014
Art. 19 - The River Basin District is managed through a River Basin District Management Plan developed by the Ministry of Environment in consultation with the River Basin District Committee approved by the Government.

The River Basin District Management Plan contains measures to implement national policy documents.
Government Decision No. 866, 01.11.2013 on approval of Regulation related to the procedure of development and review of the River Basin District Management Plan

The River Basin District Management Plan shall contain:

- General description of natural conditions
- Brief description of pressures and impacts
- Identification of protected areas
- Analysis and evaluation of monitoring network
- Evaluation of quality and quality of water resources
- Evaluation of risks
Legal framework (3/4)

- Analysis of protective areas
- Planning of construction water supply systems and new facilities for treatment of waste water
- Evaluation of risks of development of unfavorable exogenous processes
- Information regarding controls of water abstraction and dams
- Information regarding authorization for direct discharges in the surface and groundwater
- Economic analysis of water use
- Brief description of planned activities in the Program of Measures
- Analysis of financial resources to implement the RBDMP
- Other requirements, specific to the river basin
Program of Measures (PoM) as part of the RBM plan

The PoM shall consider measures to:

* Implement current legislation
* Apply cost recovery principles of water services
* Protection of water sources used for drinking purposes
* Control of water abstraction from water sources
* Reduction of pollution from point sources of pollution and other anthropic activities
* Reduction of pollution with priority substances
* Identification of water bodies that will not achieve environmental objectives
* Prevention or reduction of the impact of accidental pollution
* Public information and consultation
Program of Activities

- 0 months: Announcement, description of issues, outline
- 6 months: End of public consultations
- 9 months: First draft
- 15 months: End of public consultations
- 18 months: Final draft
- 24 months: Government approval

- Public consultation I: Nov 2013
- Public consultation II: May 2014
- Feb 2015
- May 2015
- Nov 2015
